

RAIYAN AZAMI

Chennai, India • +91 8489627338 • raiyan.azami07@gmail.com • <https://www.linkedin.com/in/raiyan-azami-0a584721b/>

Agile and Result-driven Data Science, Machine Learning, with career advancements of over 3+ years in implementing advanced statistical & predictive modeling techniques and to validate findings and build, maintain, and improve models using an iterative approach. Experienced at creating and deploying models, and analyzing data mining algorithms to deliver insights and implement action-oriented solutions to complex business problems. Overall 3+ years of experience in the IT Industry.

PROFESSIONAL EXPERIENCE

PROJECT: AUTOMATED INVOICE DATA EXTRACTION SYSTEM

TECHMANGO CONSULTING SERVICES PRIVATE LIMITED, Chennai, India - (Data Scientist)

May 2025 – Sept 2025

- Built an intelligent document processing pipeline for automated invoice data extraction using LLMs and NLP-driven entity recognition to convert unstructured documents into structured datasets.
- Applied prompt-engineering and contextual embeddings to improve field-level accuracy for vendor names, invoice numbers, dates, and item details across varied formats.
- Integrated LangChain for dynamic model orchestration and validation workflows, enabling adaptive extraction logic based on document structure.
- Deployed the solution within Bautomate's workflow automation platform, achieving high scalability, reduced manual verification, and improved extraction precision.

PROJECT: PREDICT UPCOMING MONTH INCOME FOR THE HOTEL

Colan Infotech Private Limited, Chennai, India - (Data Scientist)

Apr 2024 - Jan 2025

- Administered the data cleaning using Python Pandas and Numpy libraries.
- Implemented the Random Forest Regression model for this project after tried many models.
- Tested the model with both test data and out of time data and got accuracy 89%.
- Prepared and delivered a dashboard on the inferences obtained from data analysis.
- Increased model accuracy by 5% by handling the various data wrangling and feature reduction processes.

PROJECT: CHATBOT FOR SCHOOL MANAGEMENT

Colan Infotech Private Limited, Chennai, India - (Data Scientist)

Aug 2023 – Feb 2024

- Built a chatbot to process natural language inputs and interact with the student database, enabling efficient communication within the school.
- Input Classification and Topic Modelling: Used classification to check input relevance and topic modeling to identify the correct database.
- SQL Query Generation: Applied the T5 transformer model to convert user inputs into SQL queries, with recommendations for correcting input errors.
- Response and Data Retrieval: Generated accurate responses by retrieving data from the relevant databases.

PROJECT: RESUME PARSING SYSTEM

Colan Infotech Private Limited, Chennai, India - (Data Scientist)

Dec 2021 – July 2022

- Multi-Model Approach: Developed a resume parsing system using a combination of models such as SpaCy and BERT to extract various entities like names, skills, and experience from resumes.
- Generative Model for Training Data: Employed Gemini, a generative model, to create synthetic training data, enhancing the system's ability to recognize diverse resume formats.
- Entity Extraction and Classification: Used advanced NLP techniques for accurate entity recognition and classification, ensuring the system captures key details from each resume.
- Deployment via Flask: Deployed the resume parsing system using Flask, providing a scalable and accessible API for integration with other applications.

EDUCATION

- Master of Computer Application (MCA) / University of Madras / 2024.
- Bachelor of Computer Science (BCA) / University of Madras / 2022.

SKILLS & OTHER

- **Languages:** Python, SQL
- **Databases:** MySQL
- **APIs & Web Frameworks:** Django, Flask
- **Data Analysis:** NumPy, Pandas, Matplotlib, Seaborn
- **AI/ML Libraries:** Scikit-learn, TensorFlow, PyTorch, Keras, NLTK, Spacy, Hugging Face Transformers, OpenCV
- **Dashboarding Tools:** Power BI, Tableau
- **Algorithms:** Linear Regression, Polynomial Regression, Logistic Regression, SVM, Naïve Bayes, KNN, Decision Tree, Random Forest, YOLO, NER
- **Expertise in:** Strategic Planning, AI, Data Science, Machine Learning, Deep Learning, Computer Vision, Pattern Recognition, NLP, SQL, Topic Modeling, Object Detection, Feature Engineering, Data Modeling, Cleansing, Transformation & Mining, Statistical Techniques, Data Visualization

CERTIFICATES

- Python in Besant Technologies
- Data Analyst - Besant Technologies
- Complete Data Science - Coursera
- Machine Learning Engineer - Coursera

PERSONAL DOSSIER

Date of birth: 9th July 2000 | **Nationality:** India | **Languages:** English, Tamil, Hindi | **Passport:** V3863579
valid till 28/11/2031 | **Address:** Chennai, Tamil nadu, India.
